

INSTALLER

primador.co.za

To select your enclosure, decide whether you need to close one, two or three sides of your shower.

If the shower is to be set into a recess, simply match the door design to the size of your shower.

For wider openings, up to 1500mm, simply add an inline panel.

If you plan to build your enclosure into a corner or against a wall, create a cubicle by adding one or two panels to your choice of door.

All shower doors available with either clear or stippolite toughened glass.
